

## Day In The Life Videos

### Day In The Life Videos

A powerful tool in accident-malpractice suits is the Day In The Life Video. Combined with interviews, hospital care, and before and after footage, a Day In The Life Video can express the pain, desperation and tremendous loss of a life ruined by an unfortunate accident. No matter how artfully expressed, no argument can impact a jury more than seeing the day-to-day reality of life in a disabled condition.
