

## Settlement Brochure

### Settlement Brochure

A Settlement Brochure is a comprehensive video summary of evidence and testimony relating to a case. It can include expert and family interviews, medical evaluations, a description of client injuries and treatment, detailed breakdowns of medical costs and wage loss, as well as future financial and family impacts.

CLVS has produced dozens of settlement brochures and we understand that each case is unique. The Settlement Brochure is prepared with a mix of voice-overs, background music, video clips and photos, and is utilized by insurance companies and attorneys in personal injury, medical malpractice and wrongful death suits. It is often used to vividly communicate that you are prepared to go to trial. Should the case go to trial, the Settlement Brochure can become the foundation of the Day In The Life video which is shown to the jury.
